OBJECTIVE

Final-year Computer Science undergraduate (2026) with strong proficiency in Java and solid understanding of Software Development Life Cycle (SDLC). Seeking an entry-level Software Developer role in the IT industry to contribute to design, development, testing, deployment, and support of high-performing, scalable, and maintainable applications in cloud and AI-driven environments.

EDUCATION

SVERI's College of Engineering, Pandharpur June 2022 – 2026
Bachelor of Technology in Computer Science and Engineering CGPA: **9/10**

Vidya Mandir Junior College, Vairag June 2020 – March 2022
Higher Secondary Certificate (HSC – Science) Percentage: **86%**

Tulshidas Jadhav Prashala, Vairag March 2020
Secondary School Certificate (SSC) Percentage: **91.40%**

SKILLS SUMMARY

Programming Languages: Java, JavaScript, HTML5, CSS3

Software Engineering Concepts: SDLC, OOP, DBMS, SQL, Agile Methodology, Problem Solving

Web Concepts: REST APIs

Tools/IDEs: Visual Studio Code, GitHub, MinGW

Professional Skills: Analytical Thinking, Fluent Communication (Written & Verbal), Team Collaboration, Stakeholder Interaction, Adaptability

WORK EXPERIENCE

Trainee – Web Development Sun Software, Barshi June 2024

- Structured and implemented responsive and maintainable UI components using HTML5 and CSS3.
- Analyzed issues, rectified failures, and enhanced features to improve performance and reliability.
- Collaborated with team members and mentors to deliver high-quality, customer-focused software solutions.

PROJECTS

Travel Booking Management System (Web Application) HTML, CSS, JavaScript, REST APIs

- Developed a full-featured web application to manage travel bookings following end-to-end Software Development Life Cycle (SDLC) processes.
- Built modular, maintainable components using clean coding practices to improve system scalability and readability.
- Integrated secure user authentication and database operations for storing and retrieving booking information.
- Debugged application issues, fixed failures, and enhanced system reliability and performance.
- Delivered a responsive, high-performing user interface optimized for usability across multiple devices.

Electricity Billing Management System (Desktop Application) Java, Swing, MySQL, JDBC

- Designed and developed a desktop-based billing application using Java Swing for user interface and MySQL for backend data management.
- Implemented role-based authentication (Admin/Customer) with secure login validation using JDBC.
- Created and managed relational database schema for handling customer records, meter details, billing data, and tax calculations.
- Built modular and maintainable components for customer registration, meter tracking, bill generation, and payment status management.
- Integrated MySQL database connectivity and performed CRUD operations with optimized SQL queries.
- Analyzed application issues, resolved database connectivity errors, and query/schema mismatches to improve system reliability.

CERTIFICATIONS

Core Java Certification – Udemy

- Hands-on experience in OOP, Exception Handling, Multithreading, Collections Framework, and analytical problem-solving.

The Web Developer Bootcamp 2025 – Udemy 2025

- Trained in front-end and back-end development, SDLC processes, testing, and deployment.
- Worked with Git and GitHub for version control and collaborative development.
